

Fall Recommendations

- Variety Selection
- Seed Treatment
- Field Considerations
- Planting Success
- Fertilizer Solutions
- Bugs
- Weeds

65% of your yields will be determined when the drill pulls out of the field

What is the value of seed treatments?

- Stand establishment
- Plant Health
- Quicker canopy
- Protect the yield potential

**A revolutionary new
seed treatment
for cereals**

Awaken ST

A revolutionary new seed treatment for cereals

Untreated

Awaken ST

Awaken ST

- **classed as a trace element - not subject to pesticide regulations**
- **available in an easy to use – non dusty - formulation that readily coats the seed**
- **spreads evenly to provide consistent absorption through the seed coat**

The **Awaken** ST Advantage

- **more vigorous early growth**
- **larger root system**
- **improved establishment**
- **reduces frost-kill or heave**

A wide-angle photograph of a grassy field. The foreground is filled with tall, green grasses with some yellowing at the tips. The middle ground shows a transition to shorter, more yellowish grasses. In the background, there is a line of trees under a grey, overcast sky.
