General Information:

Nature Safe 10-2-8 has been formulated as a highly concentrated fertilizer providing excellent root and shoot stability with controlled plant growth. It is well suited for areas of nitrogen and potassium deficiencies. Nature Safe 10-2-8 contains various meat by-product meals which provide nitrogen that will slowly release over a 7-8 week period. Carbohydrates in the form of simple sugars and starches will stimulate microbial activity. Humus has been added to improve Cation Exchange Capacity (CEC), buffer the soil against extreme salt concentrations and improve soil structure for tolerance during heat & drought conditions. Nature Safe 10-2-8 is non-burning and very low in salt. Virtually all of the product is utilized through complete plant uptake, minimal leaching and volatilization. Nature Safe acts as a sponge in retaining moisture and nutrients for plant use, especially in sandy soils.

Directions for Use:

Established Turfgrass: Use as a topdressing for greens, tees, roughs and fairways or any established turf. Apply 5 to 10 lbs. per 1,000 sq. ft. (0.5 to 1 lb. actual N). Results are enhanced during aeration. Covers from 5,000 to 10,000 sq. ft.

Fine grade product suggested for use on turf mowed at heights of 1/2" or lower.

Coarse grade product suggested for use on turf mowed at heights over 1/2".

New Turfgrass Seeding: Incorporate 10 lbs. per 1,000 sq. ft. into the top 2-4 inches of the seedbed before seeding or sodding. Covers up to 5,000 sq. ft.
